

FLIGHTS

Nirvana's team of travel consultants are available to book your flights and arrange any air shipment of specialist equipment. We work every day with most of the world's major airlines and airports, giving the team an in-depth knowledge of the best ticketing options and carriage/transfer policies.

Bike carriage (if applicable) is pre booked and paid ahead of travel, ensuring your bike is guaranteed to be transported on your flight. Our understanding of the wide range of airline carriage policies, ensures your bike shipment is compliant and the consignment is transported safely and securely.

Working closely with our event partners enables our travel consultants to align your personal travel itinerary with the event programme, removing those stressful friction points.

All flights booked and departing the UK are ATOL protected by the Civil Aviation Authority, Nirvana Europe, ATOL Holder 6985.
